

Activity #11 - Operator Overloading

Overload the comparison operators (< == >) in your MyClass class from the first C++ activity. The results of the comparisons are defined as follows for MyObject m1 and MyObject m2

- m1 < m2 if m1.a < m2.a
- m1 > m2 if m1.a > m2.a
- m1 == m2 in all other cases

Submit a document with your overloaded methods, sample usage, and sample output. You do not need to submit the entire class.
